INDEPENDENT PROJECTS_____

Full Stack E-Commerce App [JavaScript, HTML and CSS] Site | GitHub

- Build a full stack web application that allows the users to sign up, sign in, add products to cart, place the order, input shipping address, and pay with PayPal
- Used HTML and CSS for web design, JavaScript for user interactivity, React and Redux for frontend implementation, Node, Express and MongoDB for web API, Heroku for application deployment

React App Development [JavaScript, HTML and CSS]

Site | GitHub

- Built a web application to display the featured rooms and the detailed information of a beach resort hotel
- Used React Router for routing, Context API for state management, React Icon to display the service provided, and GitHub Pages to host the application

Personal Portfolio [JavaScript]

Site | GitHub

- Built a personal portfolio to showcase projects and experiences using React and JavaScript
- Designed and implemented a flexible web design to optimize user experience and aesthetic

WORK EXPERIENCE

Receptionist, Qidian Education (Tutoring Services), Toronto

March 2019 - March 2020

- Greeted clients, responded to their questions professionally, provided a detailed introduction of product offerings, and facilitated the relationship between the instructors and students
- Utilized MS Excel and customized software to handled records management
- Coordinated office operations and daily administrative tasks, demonstrated strong time management and organizational skill
